PROFESSIONAL EXPERIENCE

COMEND

Full-Stack Software Developer

Toronto, ON

August 2024 - March 2026

- Architected and launched a HIPAA-compliant research platform from 0-to-1 in 12 months, enabling patient advocacy groups to securely upload and manage research plans, biosamples, disease models, clinical datasets, and RFPs.
- Engineered a high-performance dual-sided marketplace by integrating Typesense for real-time search, filtering, and discovery of CROs, researchers/academics, patient groups, and published research.
- Developed a scalable backend and security architecture, utilizing Prisma and PostgreSQL to manage complex relational data while enforcing strict Role-Based Access Control (RBAC) and NextAuth protocols for granular access to sensitive medical data.
- Deployed comprehensive product analytics using Mixpanel, tracking user funnels and engagement metrics to inform feature prioritization and UI/UX iterations.
- Collaborated directly with the Product Manager to translate high-level requirements into user-centric features, leading the UI/UX design and frontend development in Next.js.

MONOGRAM CREATIVE CONSOLE

Software Engineering Lead & Full-Stack Software Developer

Toronto, ON

August 2021 - August 2024

- Engineered a 90% reduction in weekly customer support issues over 1.5 years by modernizing and stabilizing the core software stack (C++, Qt/QML, Node.js).
- Designed and implemented a RESTful API to sync user licenses across AWS, Keygen, and Shopify for 3,000+ monthly active users.
- Spearheaded a full-scale backend migration from JavaScript to TypeScript, improving application stability and reducing production runtime errors.
- Led real-time integration for 10+ third-party plugins (Adobe Photoshop, Lightroom, Premiere Pro) by collaborating with external developers to maintain reliable API interactions.
- Mentored and led several cohorts of co-op engineers, streamlining the onboarding process and guiding technical development to ensure each student delivered a high-impact feature within their first term.
- Orchestrated end-to-end release management and CI/CD pipelines using GitHub Actions and AWS S3, ensuring consistent and reliable monthly deployment cycles.
- Integrated and maintained product analytics using Amplitude, leveraging data to track engagement and guide feature development for 3,000+ users.

MONOGRAM CREATIVE CONSOLE

Software Development Co-op

Kitchener, ON

May 2019 - August 2020

- Led a UI/UX redesign of the Monogram Creator app to support new hardware technology and improve user workflows (Qt, C++, QML).

PRACTICALGENOMICS

Software Developer (Contract)

Sudbury, ON

May 2018 - August 2018

- Engineered an application to analyze sequencing data from next-generation sequencing (NGS) machines to determine sequences that are unique to each patient's cancer, and assist doctors in diagnosing thousands of patients across Ontario (Samtools, HTSJDK, Java).

EDUCATION

UNIVERSITY OF TORONTO

UI/UX Professional Certificate

Toronto, ON

March 2023 - August 2023

QUEEN'S UNIVERSITY

Bachelor of Computing Honours (Software Design)

Kingston, ON

September 2016 - April 2021

SKILLS

- Languages/Frameworks: TypeScript, JavaScript, C++, Java, SQL, Next.js, React, Node.js, Prisma, Qt/QML, Redux, UXP, CEP, ExtendScript.
- Tools/Cloud: PostgreSQL, Typesense, GCP, AWS (S3/Lambda), Git, GitHub Actions, Mixpanel, Amplitude, Figma, Jest.
